

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts and other forklifts could have specific labels for use in some hazardous locations. The mark denotes that this specific model of lift truck meets the minimum standards of ANSI/UL 553 for electric forklifts or ANSI/UL 558 meant for internal combustion engine forklifts.

Applications for labeled trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Consult your local insurance carrier and Fire Marshall for further information on the approved uses of industrial powered forklifts in your application.

If the particular forklift meets the outlined criteria, labels can be placed. A labeled lift truck would show the type of designation located on the nameplate and will have a properly corresponding label placed.
