

Aerial Work Platforms

Aerial Work Platforms - There are numerous attachments utilized for forklifts which could be utilized to be able to help expand the functionality of your lift truck and allow you to lift stuff, handle materials with less effort or to accomplish clean-up jobs.

Some accessories were specially used for the forks themselves. For instance, blade extensions could be used whenever you need more blade length, that increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are another type utilized when transferring rolled material to be able to ensure it does not roll off of the standard flat forks.

Lifting accessories could be pivoting and telescoping crane attachments. They come in many styles. These accessories are often designed for transferring lumber, metal bars, poles or whichever kind of bulky things. Additional attachments like for instance other styles of hook plates and hooks are available to lift items utilizing a chain or sling. Slab lifters and magnetic lifters are other things that can be utilized along with hook accessories. Slab lifters are specialized accessories which are designed for lifting different materials that are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools that connect to your lift truck so as to make transporting rolls of carpet much easier. The accessory connects onto the lift truck's blades and has a pole which goes through the center of the carpet roll.

There are many different kinds of lift truck attachments which can be utilized for facility maintenance like for instance snow blades. These blades connect to front end loaders and could transfer materials such as soil, snow and dirt. Other popular cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers includes a broom that the forklift blades hook onto for sweeping big spaces like parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments such as on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up fast and effortless.

A material spreader is another lift truck accessory that is usually used at facilities. These spreaders are useful for a range of applications like spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Work platforms are another optional lifting attachment which lots of companies make use of daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few units available that are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location utilizing the forklift. Larger platform models have added space for personnel to bring tools and other essential items meant for the task. Usually work platforms are constructed of steel or ploy material.
