

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country trip in their RV. Recently retired, after spending several years working with his brother to assemble their crane business into an market leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

Whilst on their trip, John spent time talking to former business associates whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a considerable market for a product that could swiftly and safely lift people in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The business incorporates some of the basic design elements of that original lift into current designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has extended itself into quite a few international marketplaces and continues to develop innovative machinery to guarantee that consumers are able to become safer and more resourceful within their workplace.
