

Rotator for Forklift

Forklift Rotator - There are various applications available for lift truck attachments. For example, the forklift rotator could help lifting, moving and rotating drums and barrels. Different attachments can be utilized to pick up cartons and carpet rolls, for pouring sand or waste materials. Several of the most regularly used lift truck attachments are the clamp, side shifter accessories, fork positioner and rotator. These tools come in a variety of measurements to fit a variety of forklift units. They are designed to hold really heavy items and are an advantage to lots of warehouse and factory environments.
